ONE goes a long way

MOTPOLY XR

Lacosamide...in a single daily dose may make a difference

IMPORTANT SAFETY INFORMATION

Do not stop taking MOTPOLY XR without first talking to your healthcare provider. Stopping MOTPOLY XR suddenly can cause serious problems. Stopping seizure medicine suddenly in a patient who has epilepsy can cause seizures that will not stop (status epilepticus).

Could MOTPOLY XR be right for your partial-onset or primary generalized tonic-clonic seizures?

Do you take multiple medications multiple times per day?

Are you too busy to remember to take your medications?

A once-daily medication may ease the load

Not actual patients.

INDICATION

MOTPOLY XR is a prescription medicine used for adults and children weighing at least 110 pounds (50 kg) to treat partial-onset seizures and with other medicines to treat primary generalized tonic-clonic seizures. It is not known if MOTPOLY XR is safe and effective for partial-onset seizures in children weighing less than 50 kg.

IMPORTANT SAFETY INFORMATION

MOTPOLY XR can cause serious side effects, including:

- **Suicidal thoughts or actions** in a very small number of people, about 1 in 500. Call a healthcare provider right away if you have any of these symptoms, especially if they are new, worse, or worry you: thoughts about suicide or dying; attempt to commit suicide; new or worse depression; new or worse anxiety; feeling agitated or restless; panic attacks; trouble sleeping (insomnia); new or worse irritability; acting

2 Please see enclosed Medication Guide.

Challenges people with epilepsy may face

Comorbidities

66% of adults with epilepsy have at least **4 other chronic conditions**¹

- Among the most common are CNS- and psych-related disorders^{2*†}

Polypharmacy

~50% of people with epilepsy take at least **5 medications, 3x higher than the general population (15%)**^{3,4}

*Psychosocial concerns, depression, severe headache, anxiety, migraine, learning difficulties, intellectual and developmental disabilities, and autism spectrum disorders.^{2,5}

† Other non-CNS conditions include heart disease, stroke, hypertension, prediabetes, cancer, dermatitis, arthritis, emphysema, asthma, and ulcer.⁵

CNS=central nervous system.

aggressive, being angry, or violent; acting on dangerous impulses; an extreme increase in activity and talking (mania); or other unusual changes in behavior or mood.

- **Feelings of dizziness, double vision, sleepiness, or problems with coordination and walking.** Do not drive, operate heavy machinery, or do other dangerous activities until you know how MOTPOLY XR affects you. You should not drink alcohol while taking MOTPOLY XR.
- **An irregular heartbeat or may cause you to faint.** In rare cases, cardiac arrest has been reported. Call your healthcare provider right away if you: have a fast, slow, or pounding heartbeat or feel your heart skip a beat; have shortness of breath; have chest pain; feel lightheaded; or fainted or if you feel like you are going to faint. If you have fainted or feel like you are going to faint you should lay down with your legs raised.

You are not alone

Successful management of your seizures requires an active partnership between you, your healthcare provider, and family and friends.

There are things you can do to take care of yourself and your health including⁶:

- Take your seizure **medicines** as prescribed
- Keep a record of your seizures and **track patterns** to help avoid triggers
- Get at least 7 to 8 hours of **sleep** each night
- **Exercise** regularly and safely each day
- Practice ways to **lower stress**
- Keep in touch with **friends** and **family** for support
- **Talk to your doctor** about health concerns

IMPORTANT SAFETY INFORMATION (cont)

- **Abuse or drug dependence.** MOTPOLY XR is a federally controlled substance (CV). Keep MOTPOLY XR in a safe place, to protect it from theft. Never give your MOTPOLY XR to anyone else, because it may harm them. Selling or giving away this medicine is against the law.

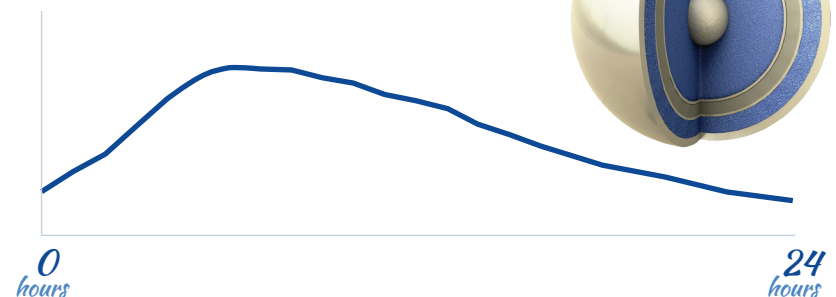

MOTPOLY XR may help

What is MOTPOLY XR?

- **MOTPOLY XR** is a prescription medicine used to treat partial-onset seizures in adults and in children weighing at least 110 pounds (50 kg) and with other medicines to treat primary generalized tonic-clonic seizures. It is not known if MOTPOLY XR is safe and effective for partial-onset seizures in children weighing less than 50 kg⁷
- **MOTPOLY XR** can be taken alone or in addition to other epilepsy medications⁷

What makes MOTPOLY XR different?

- **MOTPOLY XR** has a proven technology that allows for a steady release of drug over time. This is why you only need to take **MOTPOLY XR** once daily^{7,8}

- **A serious allergic reaction** that may affect your skin or other parts of your body such as your liver or blood cells. Call your healthcare provider right away if you have: a skin rash, hives; fever or swollen glands that does not go away; shortness of breath; tiredness (fatigue); swelling of the legs; yellowing of the eyes or whites of the eyes; or dark urine.

ONE and done

Your doctor has prescribed **MOTPOLY XR** for you

MOTPOLY XR comes as a 100-mg, 150-mg, and 200-mg capsule

- **MOTPOLY XR** is taken **once-a-day**⁷
- Your doctor will decide which dosage is right for you
 - Your doctor may change your dose if needed
- You can take **MOTPOLY XR** with or without food⁷
- Capsules should be swallowed whole with liquid⁷
 - Do not open, chew, or crush the capsules

Do not stop taking MOTPOLY XR without first talking to your doctor

Not actual patients.

IMPORTANT SAFETY INFORMATION (cont)

The most common adverse reactions are double vision, headache, dizziness, nausea, and sleepiness.

These are not all the possible side effects of MOTPOLY XR. Before you take MOTPOLY XR, tell your healthcare provider about all of your medical conditions, including if you have or have had:

- depression, mood problems or suicidal thoughts or behavior
- heart, kidney or liver problems
- abused prescription medicines, street drugs or alcohol in the past.

6 Please see enclosed Medication Guide.

SWITCH to One

Could **MOTPOLY XR** be right for you?

If you are already on lacosamide, your doctor may recommend you switch to once-daily **MOTPOLY XR**

- Equivalent dosing to lacosamide^{7,9}
- Side effects with MOTPOLY XR are expected to be similar to those with immediate-release lacosamide^{7,9}
- The most common side effects are dizziness, headache, nausea, and double vision⁷

Your doctor can help make the switch from lacosamide IR to MOTPOLY XR easy

Not actual patients.

Talk to your healthcare provider if you are pregnant or plan to become pregnant. It is not known if MOTPOLY XR can harm your unborn baby. Also talk to your healthcare provider if you are breastfeeding or are planning to breastfeed as MOTPOLY XR passes into breast milk.

Taking MOTPOLY XR with certain other medicines may cause side effects or affect how well they work. Do not start or stop other medicines without talking to your healthcare provider. Do not start or stop any medicines while taking MOTPOLY XR without talking to your healthcare provider.
